

AP Chemistry Summer Assignments:

Read chapters 1-4 in the textbook, Chemistry, (Zumdahl and Zumdahl eighth edition) As you read each chapter pay close attention to any worked out problems.

After each chapter please go to the National Math and Science Initiative (NMSI) AP Chemistry website.

(IMPORTANT: The wikispaces website that hosts these notes will close on July 31st 2018. After that date you will have to email to get any of the documents.)

The website is updated and changed often, so direct links to the files you need are below.

Download the pdf files that correspond to chapters 1-4, and store them as files in notability on your iPad. For each set of notes, there is a companion video that explains the notes and works through the problems. **The password for the videos is "linuspauling"**

Workout all of the sample problems in notability or on paper. There is a companion video for each chapter you should watch that will explain the chapter and works out the problems.

These will be turned in via Canvas or hardcopy at the start of the school year.

These are the files you need to work with from the NMSI website:

Chapter 1:
