

Environmental Club

Moderator: Ms. Joelle Howe

Mission: Bishop Verot Environmental Club is committed to learning about, helping, and having fun in our beautiful Southwest Florida environment. Club members manage the native butterfly garden on campus, assist and promote campus recycling, participate in community events like International Coastal Cleanup and Red Sox "Green Team" all the while earning community service. Students also plan and attend quarterly excursions to local parks and wetlands where we bird watch, hike, cookout or canoe. This is a low-key club where kids who care about the environment can share ideas, serve the community, and have fun making new friends.

Meetings: Thursdays
